

NRTs Springtime Scavenger Hunt!

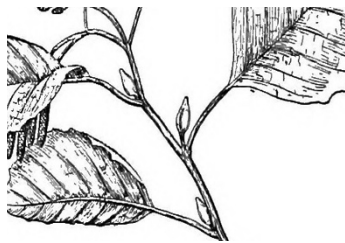

Spring is in the air, which means there are lots of wonderful things happening in nature! As animals start to become more active and warmer weather approaches, there will be rapid changes in our outdoor scenery. Can you find some of these signs of new plant and animal activity next time you are outside? Check off each Springtime sign as you find them!

Hint: Use what you find to help you decide how to color each picture!

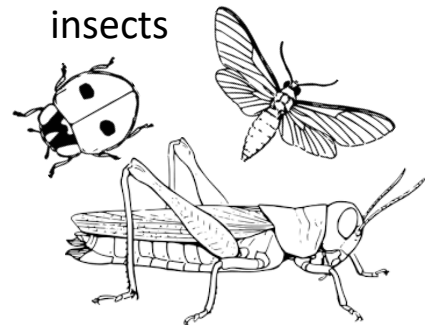

One blooming flower

One budding branch

Three different insects

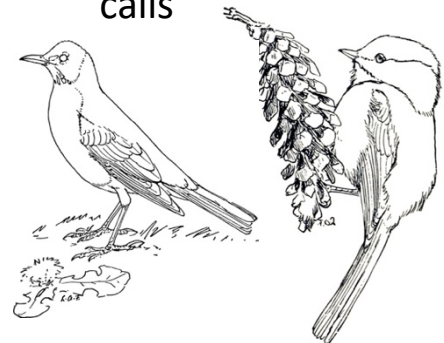

One pinecone

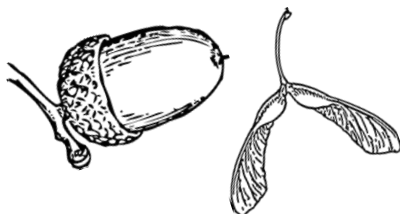

Any type of animal tracks

Two different bird calls

Two different seeds

One mammal

A type of fungus

We would like to remind everyone to please reference our bulletin boards at Sheep Pasture for information regarding how to responsibly use our spaces as families and individuals at this time.
